PROFESSIONAL SUMMARY

Senior Software Engineer and Flutter Developer with 4+ years of professional experience architecting, building, and deploying scalable cross-platform mobile and web applications for Android and iOS. Specialized in Flutter, Dart, Clean Architecture, reactive state management (GetX, Provider), resilient networking with Dio, and real-time cloud streaming via AWS IoT Core (MQTT) and Firebase. Proven track record of shipping 20+ commercial applications and 350+ store releases across Google Play Store and Apple App Store, maintaining 99.8% crash-free sessions with comprehensive automated unit and widget testing.

TECHNICAL SKILLS

Core Languages & Frameworks: Dart, Flutter (Android, iOS, Web), Python, Java, HTML5, CSS3, SQL

Architecture & Design Patterns: Feature-First Clean Architecture, Modular DDD, Repository Pattern, Singleton, Factory Pattern, MVC

State Management: GetX (Rx, Obx, GetxController, Worker), Provider, ChangeNotifier

Networking & Real-Time: RESTful APIs, Dio (Interceptors, Smart Retry, Single-Flight Token Refresh Locks), AWS IoT Core (MQTT over WebSockets), Firebase Cloud Messaging (FCM), WebSockets

Local Storage & Persistence: Flutter Secure Storage (AES Encryption, KeyStore/KeyChain), Hive NoSQL, SQLite (sqflite), SharedPreferences

Cloud, Telemetry & Security: Firebase (Crashlytics, Analytics, Remote Config, Performance Monitoring, Firestore), PostHog (Session Replay), AWS WAF Bot Control, Cloudflare Turnstile, JWT Auth

Testing & Quality Assurance: Unit Testing, Widget Testing, Integration Testing (flutter_test), Mocktail, Static Code Analysis (flutter_lints)

DevOps, Tooling & Build: Git, GitFlow, GitHub Actions, GitLab CI/CD, Android Studio, Xcode, VS Code, Postman, Gradle Kotlin DSL, Product Flavors, Core Library Desugaring, JKS Keystore Signing

WORK EXPERIENCE

Logix Built Solutions Limited *Surat, Gujarat, India*

Sr. Software Engineer – Flutter Developer *May 2025 – Present*

★ Honors: Code Craft Excellence Award (2025) for exceptional code craftsmanship, modular architecture, and technical quality.

- Architected production-grade cross-platform mobile applications using Flutter, Dart 3.x, and GetX under a modular Feature-First Clean Architecture.
- Engineered a thread-safe Single-Flight Token Refresh Lock using Dart Completers in Dio network interceptors, eliminating 401 race conditions during high-concurrency app launches.
- Integrated low-latency real-time booking dispatch using AWS IoT Core (MQTT over Secure WebSockets), cutting notification delivery latency from ~25s down to <300ms and improving booking acceptance by 42%.
- Optimized the application startup lifecycle with an unblocked frame-1 bootstrap pipeline (MyAppLoader), eliminating cold-start white screens and reducing First Contentful Paint (FCP) by 1.8s.
- Built custom mathematical and astrological rendering engines using Flutter CustomPainter, paired with an offline-first Hive NoSQL caching tier and PDF export capabilities.
- Implemented enterprise security safeguards, including AWS WAF Bot Control header validation and Cloudflare Turnstile integration to defend against scraping and API abuse.
- Established automated release builds utilizing Android Product Flavors (stage and prod), Gradle Kotlin DSL, Java 21 Core Desugaring, and automated Keystore signing.
- Authored automated unit, widget, and mock test suites using flutter_test and Mocktail to prevent regression across mission-critical booking and authentication modules.

Dinjan Infotech *Surat, Gujarat, India (Remote)*

Flutter Developer *June 2024 – April 2025*

- Developed, refactored, and shipped high-performance cross-platform mobile applications for Android and iOS using Flutter and FlutterFlow.
- Migrated legacy application state from setState to reactive GetX architecture, resolving persistent launch freezes and improving screen rendering performance to consistent 60fps.
- Integrated complex REST API endpoints with automated JSON serialization, error boundaries, and offline caching via SharedPreferences.
- Managed end-to-end publishing pipelines, coordinating app compliance, release assets, and bundle uploads to Google Play Console and Apple App Store Connect.
- Mentored junior engineers on Flutter widget lifecycles, memory leak profiling with Flutter DevTools, and defensive code quality standards.

White Orange Software *Surat, Gujarat, India*

Mobile App Developer - Flutter Developer *June 2022 – May 2024*

- Developed and maintained multiple commercial Flutter applications across diverse verticals, including enterprise logistics, e-commerce, and financial tracking.
- Designed accessible, responsive layouts supporting 100+ device form factors across mobile phones, tablets, and foldable viewports using Flutter ScreenUtil.
- Integrated secure payment gateways, OTP-based phone authentication, interactive Google Maps geolocation services, and background push notifications via FCM.
- Profiled application performance and memory footprints using Flutter DevTools, minimizing widget rebuilds and eliminating UI jank in long scrollable lists.
- Collaborated in cross-functional agile teams alongside product managers, UI/UX designers, and backend developers across bi-weekly sprint deliverables.

White Orange Software *Surat, Gujarat, India*

Intern - Android Developer *January 2022 – May 2022*

- Developed native Android modules in Java using Android Studio for an enterprise Human Resources and payroll management system.
- Implemented real-time employee-HR chat messaging and live database synchronization using Firebase Realtime Database and Cloud Firestore.
- Conducted mobile defect tracking, device fragmentation testing, and performance diagnosis across Android API levels.

FEATURED PROJECTS

Pandits Near Me (PNM) Mobile *Google Play Store & Apple App Store*

Flutter, Dart, GetX, AWS IoT Core, Dio, Hive, CustomPainter *Production Marketplace*

- Engineered a scalable dual-persona architecture delivering distinct interfaces, navigation stacks, and workflows for devotees and verified priests.
- Built an instantaneous order dispatch pipeline utilizing persistent MQTT sockets and local notification alarms, achieving sub-300ms broadcast response.
- Implemented dynamic pricing, GPS-based ceremonial Samagri calculations, and automated multi-lingual localization across English, Hindi, and Gujarati.
- Delivered 99.8% crash-free session stability across production releases monitored via PostHog Session Replay and Firebase Crashlytics.

PMP CSV Validator & Question Bank Studio *Flutter Web & Desktop*

Flutter Web, Dart, Python, CanvasKit, HTML5 Web APIs *Enterprise Tooling*

- Architected a 34-checkpoint syntax and schema validation engine with one-click bulk Auto-Fix routines for unclosed HTML tags, broken tables, and mojibake text.
- Replaced exponential regex backtracking with an O(N) linear character scanner and Base64 placeholder collapsing UX, slashing 70MB+ CSV load times from 8,000ms to <250ms and cutting browser memory by >70%.
- Engineered zero-latency multi-monitor preview synchronization using the HTML5 BroadcastChannel API and window.onStorage listeners for detached popout emulators.
- Built a mobile emulation suite with 15+ real-world device presets (iPhone, Galaxy Ultra, Foldables, iPads) supporting KaTeX LaTeX equations and horizontal table scrolling.

The Healthi Indian *Google Play Store & Apple App Store*

Flutter, GetX, REST APIs, SharedPreferences *Nutrition Platform*

- Re-architected application state management to GetX, eliminating splash screen startup bottlenecks and laggy list filtering.
- Implemented real-time search, category filtering, and offline recipe caching using SharedPreferences.

Artha - Finance Tracker *Flutter Web & GitHub*

Flutter, Dart, Offline-First Architecture, Local Storage *Wealth Management*

- Developed an offline-first architecture to track income, expenses, EMI loans, and gold investments without requiring a remote database or telemetry.
- Built financial analytics charts, recurring transaction duplicate prevention, and JSON/CSV backup and restore utilities.

EDUCATION

Master of Computer Applications (MCA) *Dec 2020 – May 2022*

Sarvajanik College of Engineering & Technology (Gujarat Technological University - GTU) *Surat, India* | ***Distinction (CGPA: 7.61 / 10.0)***

Key Coursework: Advanced Computer Applications, System Architecture, Database Management Systems, Software Engineering, Mobile Computing.

Bachelor of Computer Applications (BCA) *Jun 2017 – Mar 2020*

Vivekanand College for Advance Computer & Information Science (VNSGU) *Surat, India* | ***Distinction (CGPA: 7.39 / 10.0)***

Key Coursework: Data Structures & Algorithms, Object-Oriented Programming, Web Technologies, Database Management, Operating Systems.

HONORS & AWARDS

- **Code Craft Excellence Award (2025):** Conferred by Logix Built Solutions Limited for technical excellence in clean modular architecture, automated testing, and code craftsmanship.
- **Academic Distinction:** Graduated with Distinction honors in both Master of Computer Applications (MCA) and Bachelor of Computer Applications (BCA).
