DHRUVI PATEL

Senior Flutter Developer | Mobile Application Engineer

Location: Surat, Gujarat, India • Phone: +91 9925589405 • Email: dhruvi39604@gmail.com

LinkedIn: linkedin.com/in/duvi03 • GitHub: github.com/dhruvi-mobiledev • Portfolio: dev-dhruvi.github.io/my-portfolio

PROFESSIONAL SUMMARY

Senior Software Engineer and Senior Flutter Developer with 4+ years of professional experience architecting, engineering, and publishing high-performance cross-platform mobile (Android & iOS) and web applications. Honored with the Code Craft Excellence Award (2025) for clean modular architecture, technical craftsmanship, and engineering quality. Proven track record leading dual-sided on-demand marketplace development from scratch, shipping 50+ production releases to Google Play and Apple App Store, implementing real-time IoT/MQTT messaging protocols, building thread-safe networking with single-flight locks, optimizing complex UI rendering pipelines, and establishing automated test suites (Unit, Widget, Integration) ensuring zero-regression releases.

TECHNICAL SKILLS & CORE COMPETENCIES

- Mobile & Web Engineering: Flutter (iOS, Android, Web), Dart, Java, Kotlin, Python, Responsive Layouts, CustomPainter
- Architecture & State: Clean Architecture, Modular Architecture, GetX, Provider, BLoC Pattern, Repository Pattern, Dependency Injection
- Real-Time & Networking: REST APIs, Dio, JWT Auth, Single-Flight Lock, AWS IoT Core (MQTT over WebSockets), Firebase Cloud Messaging (FCM)
- Backend & Cloud: Firebase (Auth, Firestore, Cloud Functions, Remote Config, Crashlytics, Analytics, Performance Monitoring)
- Storage & Databases: Hive NoSQL DB, Flutter Secure Storage, SQLite, SharedPreferences, Cloud Firestore
- Testing, DevOps & Release: Unit & Widget Testing, Flutter Integration Test, Mocktail, DevTools Profiling, Git, Google Play Console, App Store Connect

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Flutter Developer | Logix Built Solutions Limited *May 2025 – Present • Surat, India*

Recipient of the Code Craft Excellence Award (2025) for exceptional architecture design and product craftsmanship.

- Architecture & Engineering Leadership: Architected dual-sided on-demand marketplace applications from scratch using Flutter, Dart, and GetX under Clean Modular Architecture, driving 50+ production releases across Android and iOS.
- Real-Time Dispatch Engine: Engineered low-latency bidirectional dispatch infrastructure using AWS IoT Core (MQTT over Secure WebSockets) and Firebase Cloud Messaging (FCM), featuring signed WebSocket setup, reconnection lifecycle handlers, and platform-specific audio/vibration alerts.
- Resilient Networking & Concurrency: Implemented Dio HTTP client with smart exponential backoff retries and a thread-safe Single-Flight Lock (Completer) to completely eliminate token-refresh race conditions during concurrent API requests.
- Flutter Web Dataset QA Suite: Built a browser-based validation and auto-fix suite with a 20-rule AST parser, auto-remediating malformed HTML, broken table/list hierarchies, and encoding artifacts across multi-thousand question exam banks.
- Zero-Downtime Store Releases: Integrated Google Play In-App Updates (Immediate & Flexible), Firebase Remote Config, automated local storage migrations on version bumps, and AppLinks deep linking with auth-gated intent preservation.
- Automated Testing Suite: Authored unit, widget, and integration test suites using Mocktail and Flutter Integration Test for critical authentication, booking, and payment flows, ensuring regression-free deployments.

Flutter Developer | Dinjan Infotech Pvt. Ltd. *June 2024 – April 2025 • Surat, India (Remote)*

- Cross-Platform Delivery: Designed and deployed responsive cross-platform applications for Android and iOS using Flutter and FlutterFlow, authoring custom interactive widgets for dynamic client workflows.
- State Management & Offline Storage: Structured centralized reactive state management using GetX, integrated secure RESTful APIs, and engineered local offline caching with SharedPreferences.
- Performance Profiling: Conducted routine DevTools memory and CPU profiling, resolved layout jank and memory leaks, upgraded deprecated dependencies, and ensured continuous platform compatibility.
- Technical Mentorship: Mentored junior mobile developers on Dart idiomatic conventions, effective widget tree decomposition, and collaborative Git pull request workflows.

PROFESSIONAL EXPERIENCE (CONTINUED)

Mobile App Developer | White Orange Software *June 2022 – May 2024 • Surat, India*

- Production App Engineering: Developed, optimized, and maintained scalable iOS and Android applications utilizing Flutter, Dart, REST APIs, and Firebase across logistics, fintech, and social sectors.
- UI Optimization & Responsiveness: Diagnosed software bottlenecks, optimized list view recycling, eliminated startup UI freezes, and adapted interfaces across 20+ Android and iOS device form factors.
- Agile Team Velocity: Collaborated with cross-functional product managers, UI/UX designers, and backend teams in 2-week agile sprints, consistently meeting anticipated release milestones.

Android Developer Intern | White Orange Software *January 2022 – May 2022 • Surat, India*

- Enterprise HR Mobile App: Developed an Android application for corporate HR departments managing employee salary slips, attendance, and real-time chat between HR administrators and personnel.
- Native Tooling & Testing: Utilized Android Studio, Java, Kotlin, Firebase Realtime Database, and third-party native SDKs; performed manual testing and profiling on physical Android devices.

KEY PRODUCTION PROJECTS SHOWCASE

Pandits Near Me – Instant Puja | Stack: Flutter, Dart, GetX, Dio, AWS IoT Core (MQTT), FCM, CustomPainter *Google Play & App Store (50+ Releases)*

- Dual-sided marketplace for puja bookings. Engineered real-time MQTT dispatch over WebSockets with auto-reconnection, vector-based Kundali horoscope charts via CustomPainter, multilingual support (English, Hindi, Gujarati), and Aadhaar KYC verification.

The Healthi Indian | Stack: Flutter, Dart, GetX, REST APIs, SharedPreferences *Google Play & App Store*

- Health and nutrition platform offering curated recipes. Re-architected state management from setState to GetX, eliminating startup freezes and implementing real-time dietary macro filtering with zero data collection privacy.

Muvr User & Driver Ecosystem | Stack: Flutter, GetX, Google Maps API, REST APIs, Geolocation *Apple App Store & Google Play*

- On-demand moving and logistics ecosystem. Engineered dual-application role workflows (customer booking & mover acceptance) with atomic status state transitions and live route tracking.

Wealth Management 2.0 | Stack: Flutter, REST APIs, Push Notifications, Firebase, Charts *Apple App Store*

- Stock trading and investment management app. Enhanced core app stability by fixing chat messaging synchronization, implementing market event calendar reminders, and integrating high-priority Firebase push notifications.

FineAway – Traffic Fine Resolution | Stack: Flutter, Dart, GetX, OCR Text Scanning, REST APIs *Google Play & Apple App Store*

- Vehicle license and fine management application. Integrated camera-based OCR text recognition for automated vehicle license data extraction, fine resolution, and payment handling across Android and iOS.

EDUCATION

Master of Computer Applications (MCA) — Dec 2020 – May 2022
Sarvajanik College of Engineering & Technology (GTU) • Surat, India — Distinction (CGPA: 7.61 / 10.0)

Bachelor of Computer Applications (BCA) — Jun 2017 – Mar 2020
Vivekanand College for Advance Computer & Info. Science (VNSGU) • Surat, India — Distinction (CGPA: 7.39 / 10.0)

HONORS, AWARDS & LANGUAGES

- Code Craft Excellence Award (2025): Awarded by Logix Built Solutions Limited in recognition of exceptional code craftsmanship, modular architecture design, and technical delivery across enterprise mobile and web applications.
- Languages: English (Professional Working Proficiency) • Hindi (Professional Working Proficiency) • Gujarati (Native)
